

Koch Advanced Nitrogen® fertiliser provides strong results in winter wheat (Average 7 locations, DEFRA NT2603 study)

Deviation, in kg N/ha, from recommended rate

Deviation, in kg N/ha, from recommended rate

Yield and protein are the mean values of three replications. Protein percent calculated by multiplying (measured grain N %) x (5.4 protein conversion factor). From annex of raw data – Report for DEFRA project NT2603 “The behaviour of some different fertiliser-N materials.”

Test locations

Site name, crop	Site manager	Soil, climate
Gleadthorpe (Notts), winter barley	ADAS	Sandy, dry
High Mowthorpe (N Yorks), winter wheat	ADAS	Calcareous, dry
Stetchworth (Cambs), winter barley	ADAS	Calcareous sandy, dry
Boxworth (Cambs), winter wheat	ADAS	Calcareous heavy, dry
Rothamsted (Herts), winter wheat	Rothamsted	Medium, dry
Woburn (Herts), winter wheat	Rothamsted	Sandy, dry
Bush Estate (Lothian), winter wheat	SAC	Medium, moderate

Koch Advanced Nitrogen® fertiliser is a nitrogen fertiliser based on urea with AGROTAIN® nitrogen stabiliser. AGROTAIN® stabiliser reduces ammonia volatilisation to ensure that the N fertiliser is available to fuel crop productivity. The technology was proven in U.K. trials by ADAS, IGER/Rothamsted Research and AFBI. AGROTAIN® stabiliser is registered within EU fertiliser legislation.
